

SUPPLIER RISK & COMPLIANCE REPORT

supplier risk & compliance report

Pakistan / Punjab | Amazon, Walmart, Shopify

REPORT DECISION

Proceed with engagement as a credible manufacturer candidate, but do not make commercial commitments until the cardholder identity, signing/payment authority, exact contracting legal entity, and bank beneficiary are verified through official company channels.

EXECUTIVE SUMMARY

The business card identifies / Suzhou Jwell Machinery Co., Ltd., at No.18 Dong'an Road, Chengxiang Industrial Zone, Taicang, Suzhou, Jiangsu. Public evidence strongly corroborates the company: official Chinese and English sites (jwell.cn, szjwell.cn) publish the same address and the sales@jwell.cn email printed on the card, positioning JWELL as a large plastic extrusion equipment manufacturer with claimed export share above 75% and sales to 120+ countries/regions. Product pages and PDFs document a broad portfolio (PVC/UPVC/CPVC, HDPE, PPR/PERT/PEX pipe lines; PLA/APET/PETG/CPET and PP/PS sheet lines; WPC, film, TPU, TPO, recycling granulation, blow molding, SMS nonwoven, medical extrusion) with model-level detail such as SJZ65/132, JWS120/36 and JWPEG-H. Pakistan appears on the official global distribution selector, supporting market relevance for a Punjab buyer. Key gaps: the named contact (sales manager) is not independently confirmed as a current employee or authority; the card phone (0512-5337 7171) differs from official published numbers (+86-512-5311 1818); registry data (USCC 91320585677040514L) is from third-party directories, not primary records; CE/ISO marks are logo claims, not verified approvals; no dedicated Pakistan office/distributor was verified. External optional research was unavailable, so marketplace demand/pricing signals for Pakistan could not be independently validated.

RECOMMENDED NEXT ACTION

Before the fair: email sales@jwell.cn (copying the official contact channel) to confirm 's employment and request a stamped quotation, business license with registry extract, and model-specific CE/ISO certificates. At the fair, run the 20-question checklist above, prioritizing contracting legal entity, bank beneficiary, manufacturing base, Pakistan after-sales support, and performance guarantees. After the fair, obtain a proforma invoice matching the legal entity name, verify the bank beneficiary against company registration, and commission an independent factory audit or live-dated video of the Taicang site before any payment.

QUESTIONS TO ASK THE SUPPLIER

1. Which exact legal entity will sign the contract and issue the invoice - Suzhou Jwell Machinery Co., Ltd. or another JWELL member company?
2. Who is the bank account beneficiary name, and in which country and bank is the account held?
3. Can you issue a stamped quotation on official letterhead from sales@jwell.cn for the target line?

4. Is a current employee of Suzhou Jwell Machinery Co., Ltd., and can you confirm his role through the official company channel?
5. Why does the card list 0512-5337 7171 while official pages list +86-512-5311 1818 - which number is correct for this order?
6. Which production base (Taicang or another JWELL plant) will manufacture the ordered machine, and can you provide a live-dated factory video?
7. Can you provide a current business license and registry extract showing the unified social credit code 91320585677040514L?
8. Which certifications (CE, ISO 9001:2015) apply to the exact model being quoted, and can you share the certificates naming the legal entity?
9. What is the guaranteed output (kg/h) and stability of the quoted line - e.g., the PLA/APET/PETG/CPET sheet line at up to 800kg/h or the WPC foam board line at 400~550kg/h - and is there a performance guarantee?
10. What are the lead time, warranty period, and included spare-parts package for the first 12-24 months?
11. Do you offer installation, commissioning, operator training, and after-sales support in Pakistan, and through whom?
12. Which Pakistan references or installed bases can you share, with contactable customers in Punjab?
13. Who covers freight, customs, and site-preparation scope for delivery to Punjab, and under which incoterms?
14. What electrical and utility configuration (voltage, frequency, cooling water, compressed air) does the line require?
15. What is the payment schedule, and do you accept letter of credit or trade insurance rather than advance T/T?
16. What are the delivery terms for spare parts and consumables (screws, barrels, dies, molds) - stock, lead time, and pricing?
17. For the HDPE gas/water pipe line, against which standards can the finished pipe be validated, and what testing support do you provide?
18. Can you provide OEM/ODM customization for Punjab-specific product sizes, and what are the engineering fees?
19. Who provides remote diagnostics and how quickly can an engineer be dispatched to Pakistan if a line goes down?
20. Can you arrange a factory audit or third-party inspection (e.g., pre-shipment inspection) tied to the exact contracting entity before payment release?

BUYER BRIEF & SCORECARD

Buyer decision: Verify first
Evidence score: 2.63

QUICK ANSWERS

Real company: Real company supported

Supplier role: Manufacturer

OEM/ODM likelihood: 65

Contact relationship: Supported affiliation

Commercial authority: Unverified

Official contact route: Found

Factory evidence: Strong

Compliance readiness: Claims only

Payment readiness: Not ready

Transaction stage: Documents verification

DECISION PATH

Top blocker: Contact authority

Action now: Verify contact

Next best action: Official verification

Evidence conflicts: Material

Evidence freshness: Recent

COVERAGE SCORES

Identity: 4.2

Contact: 2.61

Factory: 4.13

Compliance: 1.02

Payment: 0.53

CRITICAL MISSING ITEMS

1. Current official registry extract from SAMR or equivalent
2. Direct public evidence that is a current employee
3. Signing authority, payment authority, and bank beneficiary name
4. Exact MOQ and current quotation for the relevant models

5. Confirmed Pakistan dealer or service partner
6. Independent factory audit or on-site visit report tied to this exact legal entity
7. Request a stamped quotation on official letterhead from sales@jwell.cn
8. Obtain a proforma invoice naming the exact legal entity and bank beneficiary
9. Verify the order will be fulfilled from the Taicang base with live factory video
10. Ask for current business license and ISO/CE certificates for the specific legal entity
11. Confirm the named contact via official company channel or LinkedIn/business directory
12. Current official registry extract (SAMR or equivalent) confirming legal entity and status.
13. Verified employment/authority of via official channel.
14. Stamped quotation on official letterhead from sales@jwell.cn for the target model(s).
15. Proforma invoice naming exact legal entity, bank beneficiary, SWIFT, and account country.
16. MOQ, lead time, incoterms, warranty terms, and spare-parts package/pricing for relevant models.
17. Confirmed Pakistan dealer, installer, or service partner; list of Pakistan installed bases/references.
18. Independent factory audit or live video verification tied to the Taicang base.

PRODUCT SCOPE

Pipe extrusion lines; Sheet extrusion lines; Plate extrusion lines; Film extrusion lines; Plastic recycling granulation equipment; Blow molding machines; Chemical fiber spinning equipment; Pulp molding machines; PVC pipe extrusion line; UPVC/CPVC pipe extrusion line; HDPE water/gas pipe extrusion line; PPR/PERT/PEX hot-water pipe extrusion line; PVC profile extrusion line; WPC door board extrusion line; PVC skinning foam board extrusion line; PLA/APET/PETG/CPET sheet extrusion line; PP/PE/ABS/PVC/PET thick board extrusion line; PP/PS sheet extrusion line; PET drying-free exhaust sheet line; PP EVA EVOH PS PE barrier sheet extrusion line

COMPLIANCE QUESTIONS

1. Which certifications (CE, ISO 9001:2015, or others) actually apply to the specific quoted model, and can current certificates be produced naming the exact legal entity?
2. No claim of regulatory or legal approval is made in this report; what documentation does JWELL provide to support the buyer's own import/customs compliance in Pakistan?
3. For medical precision extrusion equipment, what quality-system documentation applies, and what regulatory status does the buyer independently need to secure?
4. For HDPE gas pipe lines, what standards (e.g., relevant ISO/PSQCA/local Pakistani standards) can the equipment be validated against?
5. What electrical configuration (voltage/frequency), safety guarding, and documentation language can be supplied for Pakistani installation?
6. Which legal entity holds product liability and warranty obligations - Suzhou Jwell, JWELL Machinery Co., Ltd., or another member company?
7. Can the supplier provide the business license (with USCC 91320585677040514L confirmed against the primary SAMR/registry extract) and export credentials?
8. Are export control, customs, and HS-code classifications for each line documented by the supplier for Pakistan clearance?

COMMERCIAL INPUTS MISSING

1. Current official registry extract (SAMR or equivalent) confirming legal entity and status.
2. Verified employment/authority of via official channel.
3. Stamped quotation on official letterhead from sales@jwell.cn for the target model(s).
4. Proforma invoice naming exact legal entity, bank beneficiary, SWIFT, and account country.
5. MOQ, lead time, incoterms, warranty terms, and spare-parts package/pricing for relevant models.
6. Confirmed Pakistan dealer, installer, or service partner; list of Pakistan installed bases/references.
7. Independent factory audit or live video verification tied to the Taicang base.
8. Applicable certifications per model (CE/ISO scope statements).
9. Payment terms and any trade-insurance/LC acceptance.

10. Pakistan market demand data, price benchmarks, and competitor pricing - external research sources were unavailable, so no directional marketplace price/rating/trend snapshot could be produced.
11. Freight, installation, commissioning, and training costs to Punjab.
12. Local voltage/utility requirements and site-preparation scope.

SUPPLIER IDENTITY

ASSESSMENT

Likely genuine manufacturer. The card's company, address, and email domain all match JWELL's officially published Taicang base information. However, the cardholder is not publicly confirmed, and payment/contracting authority is unverified. Recommended contact route is the official company channel (sales@jwell.cn / +86-512-5311 1818) rather than the unverified individual.

SUPPORTED

Company name / Suzhou Jwell Machinery Co., Ltd. appears on official Chinese and English sites (jwell.cn, szjwell.cn, en.jwell.cn); Card address 18 matches officially published No.18 Dong'an Road, Chengxiang Industrial Zone, Taicang, Suzhou.; Card email sales@jwell.cn is published on official contact pages, corroborating company affiliation of the contact route.; Official pages claim export share above 75% and sales to 120+ countries/regions.; Official product pages and PDFs document model-level lines (SJZ65/132, JWS120/36, JWPEG-H, JW-1600/2400/3200-SMS, PLA/APET/PETG/CPET sheet lines); Third-party listings (Asia Machinery, 1688, 11467, Baidu Baike) independently echo the same address, manufacturer identity and product scope.; Pakistan appears in the official global distribution selector (en.jwell.cn/g/global.html); CNC machining and assembly workshop descriptions support factory rather than pure trading company classification.

UNVERIFIED

Employment and current role of cardholder (sales manager) - not named on official staff/contact pages.; Signing or payment authority of the cardholder.; Exact legal entity that would sign contracts and the bank account beneficiary name.; Unified social credit code 91320585677040514L and 2008 registration come from third-party directories, not primary registry records.; CE and ISO 9001:2015 marks appear as logos on the card and company claims; no independent certificate verification performed; no regulatory approval is claimed.; Dedicated Pakistan office or local distributor/service partner.

PRODUCT FINDINGS

PVC / UPVC / CPVC pipe extrusion lines

EVIDENCE

Official product page describes PVC twin-screw extruder options with high plasticizing uniformity and high output (szjwell.cn product-item-6).

STATUS

Independently documented on official product pages; model-level claims from supplier, not third-party tested.

HDPE water/gas pipe extrusion lines and JWPEG-H series

EVIDENCE

Official JWELL PDF (Changzhou 2021) lists JWPEG-H pipe line series with pipe specs and extruder models.

STATUS

Documented in official PDF; performance figures are supplier claims.

PPR/PERT/PEX hot-water pipe extrusion lines

EVIDENCE

Listed in official product portfolio pages.

STATUS

Listed; no dedicated model-level evidence gathered.

PLA/APET/PETG/CPET sheet extrusion lines

EVIDENCE

Official page states single/multi-layer co-extrusion, thickness 0.2-1.5mm, output up to 800kg/h.

STATUS

Documented on official product page with specs.

PP/PE/ABS/PVC/PET thick board, PP/PS sheet, PET drying-free exhaust sheet, barrier sheet (PP EVA EVOH PS PE) lines

EVIDENCE

Official Suzhou sheet-line PDF (2025) documents JWS120/36 and related models with widths and outputs.

STATUS

Documented in official PDF; supplier-published figures.

PVC profile extrusion lines and WPC door board extrusion lines

EVIDENCE

Listed across official product pages; group-level portfolio coverage.

STATUS

Listed; limited model-level detail in gathered evidence.

PVC skinning foam board (WPC) line

EVIDENCE

Official PDF: 1220~1560mm width, 5-20mm / 20-35mm thickness, SJZ65/132 or SJZ80/156 extruders, 400~550kg/h, 37kw/75kw.

STATUS

Documented in official PDF with specs.

TPO waterproof membrane line

EVIDENCE

Official Zhejiang JWELL PDF documents 2000mm width and 0.5-3mm thickness.

STATUS

Documented in official PDF.

TPU film extrusion lines, film extrusion lines

EVIDENCE

Listed in official product portfolio; group member-company pages cover film lines.

STATUS

Listed; limited model-level detail in gathered evidence.

SMS spunbond nonwoven lines

EVIDENCE

Official PDF lists JW-1600-SMS / JW-2400-SMS / JW-3200-SMS, 9-80g/m2, <300m/min.

STATUS

Documented in official PDF with specs.

Plastic recycling granulation equipment, WPC pelletizing machines, color masterbatch compounding lines

EVIDENCE

Official home and product pages list recycling/granulation and compounding equipment.

STATUS

Listed; some model-level PDF coverage for compounding noted in research narrative.

HDPE hollow wall winding pipe lines

EVIDENCE

Listed in official product portfolio.

STATUS

Listed; no dedicated spec sheet in gathered evidence.

Blow molding machines

EVIDENCE

Official pages cover hollow/blow molding equipment; JWELL also announced acquisition of Germany's Kautex (official news page).

STATUS

Documented via official pages and news; commercial terms unverified.

Chemical fiber spinning equipment and pulp molding machines

EVIDENCE

Official home page lists spinning complete sets, winders, screws/barrels; pulp molding listed in product focus.

STATUS

Listed; limited model-level detail in gathered evidence.

Medical precision extrusion equipment

EVIDENCE

Listed in official product portfolio pages.

STATUS

Listed; medical regulatory status unverified and should not be assumed.

MARKETPLACE FINDINGS

Amazon (Amazon.com / Amazon.pk equivalents)

FINDING

No successful external marketplace retrieval for JWELL extrusion lines on Amazon; industrial extrusion lines are atypical Amazon listings for this target market. No directional price/rating snapshot could be established. Optional external research sources were unavailable for this report.

Walmart

FINDING

No successful external marketplace retrieval for JWELL extrusion equipment on Walmart; capital machinery of this type is not a typical Walmart category. No directional price/rating snapshot could be established. Optional external research sources were unavailable for this report.

Shopify

FINDING

No successful external Shopify store or D2C storefront evidence gathered for JWELL or competing extrusion-line sellers in Pakistan. Any Shopify demand/pricing inference would be unsupported; record as a gap.

B2B marketplaces (1688 / Alibaba / Asia Machinery)

FINDING

1688 factory page (1688.com/factory/jwell.html) and Asia Machinery profile (SupID=14630) independently echo manufacturer identity, address and product scope. These are directory claims, not verified transaction, pricing, or sales-volume evidence.

Pakistan / Punjab demand context

FINDING

Pakistan appears in JWELL's official global distribution selector, but no verified Pakistan distributor, installed-base list, or local pricing was found. Punjab-specific demand, pricing, or competitor share could not be quantified because external research sources were unavailable.

PRICE POSITIONING

No reliable price positioning can be established: no quotations, MOQs, or marketplace pricing snapshots were successfully retrieved, and optional external research was unavailable. Buyer should treat any price expectations as open until stamped quotations are obtained; budgetary comparison against alternative Chinese extrusion makers (e.g., other Zhangjiagang/Nanjing/Qingdao cluster manufacturers) is recommended at the fair.

CUSTOMER PAIN POINTS

1. Unverified contact: the named cardholder is not confirmed as a current employee, creating risk of dealing with an unauthorized or moved-on contact.

2. Card phone (0512-5337 7171) differs from officially published contact numbers (+86-512-5311 1818, +86-573-8778 6088), which does not disprove affiliation but does not prove authority either.
3. Entity confusion risk: JWELL operates multiple bases and member companies (Changzhou, Zhejiang, Guangdong, Anhui, etc.), so the buyer may not know which legal entity/factory will actually build and warranty the machine.
4. Payment risk: no evidence ties the payment beneficiary to the exact contracting legal entity; paying a personal or mismatched account is a common fraud vector.
5. After-sales uncertainty: no dedicated Pakistan office or verified local installer/parts partner was found, a key concern for capital equipment in Punjab.
6. Certification ambiguity: CE and ISO 9001:2015 appear only as logos; which certificates apply to the specific quoted model is unclear.
7. Mixed group/branch branding across websites and directories can misattribute products built at a different JWELL base than the quoted one.
8. No independent performance verification of claimed outputs (e.g., 800kg/h sheet line, 400~550kg/h WPC foam board) - figures are supplier-published.

COMPETITION

1. Other large Chinese extrusion-line manufacturers in the Zhangjiagang / Nanjing / Qingdao clusters competing on PVC/PE/PPR pipe lines (specific competitor names could not be independently verified because external research was unavailable).
2. European premium extrusion machinery brands (e.g., German/Austrian makers) competing at the high end for sheet, film, and medical precision extrusion where Punjab buyers may demand tighter tolerances or certifications.
3. Used/refurbished extrusion line market, a common alternative for Punjab processors seeking lower capex.
4. Other JWELL group entities themselves - Changzhou/Zhejiang bases may quote the same product categories, so intra-group competition/entity confusion is a practical issue.
5. Local Pakistani machinery importers/traders acting as intermediaries for Chinese lines, potentially competing on service and financing rather than equipment.

ENTITY CONFLICTS

JWELL MACHINERY CO.,LTD. (group-level name)

REASON EXCLUDED

Group brand used across official contact pages; not the exact cardholder's legal entity. Distinct from ; kept separate because contracting entity must be confirmed.

JWELL MACHINERY (CHANGZHOU) CO., LTD.

REASON EXCLUDED

Different JWELL base (Changzhou) cited in PDFs for pipe/WPC specs; name, base and manufacturing site differ from the Taicang card entity, so not merged.

ZHEJIANG JWELL EXTRUDER TECHNOLOGY CO., LTD.

REASON EXCLUDED

Different legal entity/base (Zhejiang) responsible for the TPO membrane PDF; not merged with the Taicang Suzhou company.

JWELL (Dushu / other member-company variants across Changzhou, Haining, Foshan, Chuzhou)**REASON EXCLUDED**

Member-company structure confirmed on official pages; specific entities not evidenced as the card contact's employer and must not be conflated with Suzhou Jwell.

jwellmachine.com / jwell-global.com sites**REASON EXCLUDED**

Search-result-level sites with unconfirmed relationship to the card entity; not merged without matching legal name, location, domain and product category verification.

LIMITATIONS

1. Optional external research sources were unavailable (status: unavailable); no external provider detail is exposed and no conclusions are drawn from it.
2. No Amazon, Walmart, or Shopify marketplace data was successfully retrieved; any result counts, prices, ratings, or trends for these platforms cannot be reported and would be directional snapshots only in any case, not guaranteed sales.
3. Cardholder 's employment, role, and authority are business-card claims only; no independent confirmation found.
4. Card phone 0512-5337 7171 differs from official published numbers; this is noted as an observation, not proof of wrongdoing.
5. Legal registration details (2008, USCC) come from third-party directories, not a primary registry extract.
6. CE and ISO 9001:2015 appear as logos on the card and company claims; certificates were not independently verified and no legal or regulatory approval is claimed or confirmed.
7. No verified Pakistan distributor, installed-base list, or local pricing; Punjab-specific demand and competition could not be quantified.
8. All performance specs (outputs, widths, thicknesses) are supplier-published figures without third-party testing evidence.
9. Payment beneficiary, MOQ, quotations, lead times, and warranty terms were not available from the gathered evidence.
10. Directory pages may mix JWELL group and branch entities; product-to-entity attribution was kept conservative.

YOUR NEXT STEPS: ON YOUR OWN OR WITH CHINACONNECT247

This report is yours to use. You can request the supplier's documents, verify the contracting entity and bank beneficiary, compare specifications, and arrange independent inspections or qualified compliance advice yourself. You do not need to buy a service to act on these findings.

If you prefer help, ChinaConnect247 can coordinate an agreed scope, organize the evidence and questions, and connect the steps from supplier checks to samples, inspections, compliance and logistics. Independent specialists remain responsible for their own work.

OPTIONAL MANAGED SUPPORT - INDICATIVE USD RANGES

Pre-payment verification review	\$250-\$1,000
RFQ, specification, and sample plan	\$300-\$1,500
Factory visit coordination	From \$300
Inspection coordination	\$400-\$1,500 / visit
Testing and compliance coordination	\$500-\$5,000

Factory visit and inspection provider fees are separate unless expressly included in a written quotation. Every quotation identifies the scope, deliverables, assumptions, payment schedule, and whether independent-provider charges are included or separate. Ranges are indicative, not binding quotations. Unless expressly included in writing, prices exclude taxes, duties, freight, insurance, official fees, laboratory charges, legal fees, exceptional travel, product purchases, samples, and third-party platform charges. Final pricing depends on product, country, location, urgency, complexity, volume, and provider availability.

[See all services and indicative pricing at www.chinaconnect247.com/en/services](http://www.chinaconnect247.com/en/services)
