Your supplier dossier and sourcing support plan.

YOUR DECISION AT A GLANCE

Verify first

Proceed with caution as an unverified sales lead. PRORIALS appears to be a real Zhejiang manufacturer of standing desks, desk frames, L-shaped desks, folding desks, and gaming desks with a public website and marketplace presence, but it is not yet buyer-ready: the business-card address conflicts with the public company address, the cardholder Melissa is not independently verified, and no payment beneficiary or U.S. references exist. Complete verification (business license, address, employees, bank beneficiary, audit report) before any deposit or contract.

Company evidence Plausible but unverified	Payment readiness Not ready	Compliance readiness Missing
---	---	--

Before any deposit: confirm the contracting company, bank beneficiary, exact model and applicable supporting documents. Read the detailed findings and limitations before proceeding.

Know what support could cost.

Not stated–Not stated USD • combined indicative service range in your Buyer Brief

Not a final quotation. Optional work and third-party charges are confirmed separately; the individual ranges below are not a new total.

RANGE = indicative minimum to maximum service fee, USD. The following pages explain the work, what you can do yourself, and what ChinaConnect247 adds.

THE EVIDENCE

01
Does it fit
you?

READ. QUESTION.
VERIFY. DECIDE.

01 / Does this supplier fit you?

Does this supplier fit your business?
Good fit for a U.S. buyer exploring adjustable desks and related office furniture, especially if you want OEM/ODM desk programs, sample catalogs, and price/MOQ benchmarks. Not a broad fit if your product interests are outside ergonomic furniture.

Why this supplier is worth a closer look
This is a usable lead for U.S. buyers seeking private-label or wholesale ergonomic desks: public pages show real categories, named models, MOQ/price signals, and OEM/ODM positioning. It is especially relevant if you need a desk supplier rather than a general materials vendor.

What the company evidence tells us
Promising manufacturer profile with useful public product depth, but not yet a buyer-ready verified supplier. Proceed only after address, employee identity, and payment route verification.

Who could buy these products?

- U.S. office furniture importers
- Amazon/e-commerce sellers
- Workspace and home-office distributors
- Contract furniture resellers
- Private-label buyers

Potential business opportunities

- Ask for a current 2025/2026 catalog PDF and factory audit pack.
- Negotiate trial order on a core SKU like SJZ03-22R-B3 or SJZ01-22R-B6.
- Use public MOQ/price to benchmark landed cost for U.S. resale.
- Request OEM/ODM customization sheet for top-selling desk categories.

THE EVIDENCE

01
Does it fit
you?

READ. QUESTION.
VERIFY. DECIDE.

01 / Does this supplier fit you?

The company-research verdict
PRORIALS appears to be a real furniture manufacturer with a public website, product catalog pages, and marketplace presence, but the card contact is only partially corroborated and the card address conflicts with the public company address. The business looks like a manufacturer plus trading company, not a pure trader, but the public evidence is still mostly self-published or marketplace-backed, so buyer-side verification is still needed before any commercial commitment.

Assessment confidence
Likely real manufacturer; not fully verified.
Original research score: 7

contact

READ. QUESTION.
VERIFY. DECIDE.

03 / Know the company and your contact

The complete company picture

PRORIALS looks like a legitimate Zhejiang desk maker with a public website, category pages, downloadable catalogs, and extensive marketplace listings. The strongest public evidence supports adjustable desks, desk frames, L-shaped desks, folding desks, and gaming-desk lines. However, the contact card is only partly corroborated: the prorials.com domain matches the company site, but Melissa’ s identity and authority are not publicly verified. The biggest red flag is the address mismatch: card says No. 299 Zhenlongpi Road, while public profiles consistently show No. 399 Longliu Road. Treat the card as an unverified sales lead, not a confirmed contracting contact.

The legal company behind the brand

Zhejiang Prorials Advanced Materials Co., Ltd. / PRORIALS; public Chinese/English branding centers on PRORIALS, with Zhejiang Prorials Advanced Materials Co., Ltd. shown on official and marketplace pages.

THE EVIDENCE

03 Company & contact

READ. QUESTION.
VERIFY. DECIDE.

03 / Know the company and your contact

Factory and production evidence

- Marketplace profile states Manufacturer/Factory & Trading Company
- SGS audit report referenced on Made-in-China profile
- Plant area and equipment list disclosed on marketplace profile
- Official site shows raw material storage, stamping, die casting, powder coating in company-news content
- Official site and marketplace pages describe OEM/ODM/customization capabilities

Important boundary

A matching email domain supports a possible company connection; it does not, by itself, verify employment or authority to sign, quote or receive payment. Historical report wording such as “confirmed” must be read alongside the unresolved authority checks. A website, marketplace badge or certificate claim is not independent regulatory approval.

THE EVIDENCE

04
Markets &
potential

READ. QUESTION.
VERIFY. DECIDE.

04 / Markets, customers and business potential

Markets mentioned in the research

- United States
- Europe
- South America
- Eastern Asia
- Western Europe

Evidence in your destination market

The company claims exports to the United States and other regions on its own site, but no independent U.S. customer base or U.S. office was verified in the available evidence.

Customer and partnership claims

- Official site says it is a professional manufacturer with customization and global partner support.
- Official site says products are exported to 100+ countries/regions.
- Marketplace profile says OEM/ODM is available and the company is a manufacturer/factory & trading company.

Certification claims — documents still need checking

- SGS audit report referenced on Made-in-China (QIP-ASI2431369)
- Quality management system certification listed on marketplace profile
- Patent certificates listed on marketplace profile
- EU standard compliance claim on official download page

THE EVIDENCE

04 Markets & potential

READ. QUESTION.
VERIFY. DECIDE.

04 / Markets, customers and business potential

Reasons to continue the conversation

- Public product pages with multiple models and specs.
- Public prices and MOQs on marketplace listings.
- Official download page with catalogs and product collateral.
- OEM/ODM claims across marketplace pages.
- SGS audit reference on marketplace profile.

Reasons to continue the conversation (continued)

- Repeated company naming across official and marketplace sources.

Reasons to slow down and check

- Business-card address conflicts with the public company address.
- Cardholder Melissa was not corroborated on an official team/about page in the available context.
- Public company pages are largely self-published or marketplace-based; few independent third-party records were surfaced.
- No independently verified U.S. office, distributor, or service center was found in the provided context.
- Factory and employee figures vary by source/page, suggesting profile inflation or stale marketplace data.

Reasons to slow down and check (continued)

- No bank beneficiary or payment account evidence was found.
- No trustworthy public complaints/reviews tied specifically to this exact company were surfaced.
- The official about-us page returned 404 in the visit result, limiting direct verification.

THE EVIDENCE

04 Markets & potential

READ. QUESTION.
VERIFY. DECIDE.

04 / Markets, customers and business potential

Address mismatch

Assessment: Strong conflict on address. Public sources repeatedly show No. 399 Longliu Road, while the card says No. 299 Zhenlongpi Road. I would treat the card address as unverified and potentially outdated/wrong.

Card claim: No. 299, Zhenlongpi Road, Cixi Binhai Economic Development Zone, Ningbo, Zhejiang Province

Public evidence: <https://chinapurui.en.made-in-china.com/company-Zhejiang-Prorials-Advanced-Materials-Co-Ltd-.html> ; <https://m.made-in-china.com/company-chinapurui/contact.html> ; <https://www.prorials.com/contact-us.html>

Contact identity / authority not independently verified

Assessment: Partial corroboration only. The card email uses the prorials.com domain, which matches the official company domain, supporting affiliation with the company but not confirming Melissa's exact employment or authority.

Card claim: sales02@prorials.com and Melissa, Business Manager

Public evidence: <https://www.prorials.com/> ; <https://www.prorials.com/contact-us.html>

05 / Risks to resolve before you pay

Title
Market & Supplier Intelligence Report: Zhejiang Prorials Advanced Materials Co., Ltd (PRORIALS) - Standing Desks for U.S. Buyers

The Risk & Compliance decision
Proceed with caution as an unverified sales lead. PRORIALS appears to be a real Zhejiang manufacturer of standing desks, desk frames, L-shaped desks, folding desks, and gaming desks with a public website and marketplace presence, but it is not yet buyer-ready: the business-card address conflicts with the public company address, the cardholder Melissa is not independently verified, and no payment beneficiary or U.S. references exist. Complete verification (business license, address, employees, bank beneficiary, audit report) before any deposit or contract.

THE EVIDENCE

05
Risks
before
payment

READ. QUESTION.
VERIFY. DECIDE.

05 / Risks to resolve before you pay

The risk picture in plain view
Zhejiang Prorials Advanced Materials Co., Ltd (PRORIALS) presents as a Zhejiang-based manufacturer plus trading company in Cixi Binhai Economic Development Zone, Ningbo, offering electric height-adjustable desks, single/dual motor frames, L-shaped and folding desks, gaming desks, and workstations. Official product pages provide model-level specs (e.g., 73-118cm height range, 80kg load, ≤50dB noise; single-motor frames for tops ≤120cm with 60-80kg load; folding desk ZDZ01-01 at fixed 74cm, 50kg load). Made-in-China and Alibaba profiles claim OEM/ODM, an SGS audit reference (QIP-ASI2431369), plant area ~36,318 sqm, and ~867 employees, with public MOQs commonly 100 pieces and visible price bands - useful for benchmarking but not guaranteed sales. Key risks: (1) the business card lists No. 299 Zhenlongpi Road while public profiles consistently show No. 399 Longliu Road; (2) contact Melissa is a business-card claim only, whereas the official site names Steven Sun; (3) evidence is mostly self-published or marketplace-sourced; (4) no verified U.S. customer base, and no bank beneficiary evidence. External marketplace/Amazon/Walmart/trend/news data sources were unavailable, so U.S. retail demand and price positioning could not be independently confirmed. Reputation scans returned 'unknown' (no malicious signals) and WHOIS shows prorials.com registered 2024-05-08 via Alibaba Cloud - a young domain that warrants attention. Next step: run the verification question set at the fair and request the audit pack before any payment.

What the risk report supports — and what it does not
Assessment: Likely a real Chinese desk manufacturer (factory and trading company combined), evidenced by an official website with product categories, Made-in-China and Alibaba profiles, catalog download pages, and an SGS audit reference. However, evidence is largely self-published or marketplace-based; employee identities, exact address, and payment beneficiary remain unverified. Confidence: medium-high that the company exists; low that the business-card contact is a verified, authorized counterpart.

05 / Risks to resolve before you pay

What the risk report supports — and what it does not — Supported

- Legal/brand name Zhejiang Prorials Advanced Materials Co., Ltd / PRORIALS appears consistently on official and marketplace pages
- Official website www.prorials.com with product category pages (adjustable, electric, single motor frame, L-shaped, folding desks) and a download page advertising 2025/2026 catalogs
- Made-in-China profile: Manufacturer/Factory & Trading Company, OEM/ODM available, SGS audit reference QIP-ASI2431369, plant area 36,318 sqm, 867 employees
- Alibaba company profile listing height-adjustable desks, folding desks, workstations, frames, gaming desks
- Public contact route Steven Sun with phone +86 13586839737 on prorials.com contact and download pages

What the risk report supports — and what it does not — Supported (continued)

- Card email domain sales02@prorials.com matches the official company domain, supporting company affiliation
- WHOIS: prorials.com registered 2024-05-08, registrar Alibaba Cloud/HiChina, registrant region Zhejiang, CN, expiry 2034
- Reputation scan: no malicious or suspicious verdicts for domain, email, or phone (all 'unknown'; phone is a China Mobile mobile number)

What the risk report supports — and what it does not — Unverified

- Melissa's employment, role, and authority (Business Manager on card only)
- Correct factory address: card says No. 299 Zhenlongpi Road; public pages say No. 399 Longliu Road
- Payment beneficiary and bank account relationship
- Independent Chinese business registry record and legal representative
- U.S. office, distributors, or customer references

THE EVIDENCE

05
Risks
before
payment

READ. QUESTION.
VERIFY. DECIDE.

05 / Risks to resolve before you pay

What the risk report supports — and what it does not —
Unverified (continued)

- Actual export volume to the U.S. and the '100+ countries' claim
- Certifications beyond marketplace references (no independent verification of QMS or patent certificates)

Alibaba

Finding: Company profile (prorials.en.alibaba.com) lists height-adjustable desks, folding desks, workstations, frames, and gaming desks. Presence is marketplace self-published; no transaction or rating data was captured.

Walmart (U.S.)

Finding: Research source unavailable - no Walmart listings or pricing could be captured.

Made-in-China

Finding: Company profile (chinapurui.en.made-in-china.com) shows Manufacturer/Factory & Trading Company, OEM/ODM, SGS audit report reference, plant area 36,318 sqm, 867 employees, and main products standing/height-adjustable/folding/office desks. Product pages show public MOQs commonly 100 pcs and price bands. Profile figures vary by page, suggesting inflation or stale data.

Amazon (U.S.)

Finding: Research source unavailable - no Amazon listings, prices, ratings, or reviews for PRORIALS products could be captured. No U.S. retail presence can be confirmed or denied from available evidence.

Shopify / web & shopping search

Finding: Research sources unavailable - no Shopify storefronts, shopping results, or U.S. e-commerce presence could be captured.

THE EVIDENCE

05
Risks
before
payment

READ. QUESTION.
VERIFY. DECIDE.

05 / Risks to resolve before you pay

Trends & News

Finding: Research sources unavailable - no demand trend or news signals could be captured. All marketplace results, prices, ratings and trends would be directional snapshots only and none are available here.

Estimated prices and pricing evidence

Could not be independently benchmarked for the U.S. market because Amazon, Walmart, shopping, and trend data sources were unavailable. What is known from supplier-side sources only: Made-in-China product pages display public price bands and MOQs commonly around 100 pieces, and the supplier advertises OEM/ODM with downloadable 2025/2026 catalogs. Treat any supplier-quoted pricing as a starting benchmark for landed-cost modeling (FOB + freight + duty + last-mile), not as validated U.S. street-price positioning. Note the young domain (registered 2024) means little price history exists anywhere.

THE EVIDENCE

05 Risks before payment

READ. QUESTION.
VERIFY. DECIDE.

05 / Risks to resolve before you pay

Quality, warranty and customer concerns

- No trustworthy public complaints or reviews tied specifically to this exact company were surfaced - neither positive nor negative reputation could be established
- No independently verified U.S. office, distributor, or service center was found, raising after-sales and warranty-service concerns for U.S. buyers
- Factory and employee figures vary across source pages, making it hard to assess true capacity
- No downloadable PDF catalog URLs were directly captured from the site crawl, so buyers must request catalogs manually
- Contact identity is fragmented (card contact Melissa vs official contact Steven Sun), creating a risk of dealing with an unauthorized or transient contact

Competitors and comparison limits

- Generic Chinese standing-desk manufacturers on Made-in-China and Alibaba offering similar electric sit-stand desks, frames, and L-shaped models with comparable OEM/ODM terms
- Established U.S.-market desk brands and importers with verified U.S. distribution, certifications, and customer reviews
- Other Zhejiang/Ningbo ergonomic furniture clusters with mature export operations - PRORIALS has no independently verified U.S. differentiation beyond claims
- No specific named competitors could be confirmed from available evidence; U.S. marketplace competitor data was unavailable

THE EVIDENCE

05
Risks
before
payment

READ. QUESTION.
VERIFY. DECIDE.

05 / Risks to resolve before you pay

Product and destination-market documents to check

- Which U.S.-relevant certifications or test reports (e.g., electrical safety, UL/ETL-style testing, FCC-style EMC claims, CARB/TSCA title VI formaldehyde for wood panels, CA Prop 65) can you provide for SJZ models - and can you state which, if any, are already held versus obtainable on request?
- Do motors and control boxes meet applicable electromagnetic and electrical safety requirements for 110-120V U.S. voltage, and who is the component supplier?
- Does the 'EU standard compliance claim' on your download page translate to any documented, testable compliance the buyer can rely on?
- Can you provide BIFMA-style or equivalent structural/stability test data for 80kg-load claims?
- What documentation will you supply for U.S. customs entry (HS codes, country-of-origin marking, fumigation/ISPM for wood packaging)?

Product and destination-market documents to check (continued)

- No claim of legal or regulatory approval should be assumed - all certification references currently come from self-published or marketplace pages and remain unverified.

Commercial details still needed

- Current 2025/2026 catalog PDF with verified URLs
- Full price list per SKU and any volume-tier pricing
- MOQ confirmation per specific model (public signal is ~100 pcs but not confirmed per SKU)
- Sample cost, sample lead time, and mass-production lead times
- Incoterms (FOB Ningbo vs EXW vs DDP) and freight quotes for U.S. lanes

THE EVIDENCE

05
Risks
before
payment

READ. QUESTION.
VERIFY. DECIDE.

05 / Risks to resolve before you pay

Commercial details still needed (continued)

- Payment terms, deposit percentage, and bank beneficiary name
- Confirmed business license, registration number, and legal representative
- Verified address (No. 299 Zhenlongpi Road vs No. 399 Longliu Road) with geo-pin
- U.S. landed-cost inputs: duty classification, container utilization per SKU
- Packaging dimensions/weights per SKU and U.S.-market packaging/voltage customization costs

Commercial details still needed (continued)

- Warranty terms, spare-parts availability, and after-sales support for U.S. customers
- Independent factory audit report (beyond the marketplace SGS reference)

Questions to send to the supplier

- Can you share your current business license and company registration number, and confirm the exact Chinese legal name and legal representative?
- Who is Melissa, is she a current employee, and is sales02@prorials.com an official company mailbox with signing or quoting authority?
- Who is Steven Sun, what is his role in sales/export, and how do you and Melissa divide responsibilities?
- Is No. 299 Zhenlongpi Road or No. 399 Longliu Road the correct address - can you send a geo-pin and a recent stamped invoice showing the address?
- Why was prorials.com only registered in May 2024 - did the company operate under another domain or brand before?

THE EVIDENCE

05 Risks before payment

READ. QUESTION.
VERIFY. DECIDE.

05 / Risks to resolve before you pay

Questions to send to the supplier (continued)

- Can you send the 2025/2026 PDF catalog, the tabletop color guide, and a current price list?
- What is the exact MOQ per SKU for SJZ03-22R-B3, SJZ01-22R-B6, and the L-shaped and folding models?
- What are your price bands at 100, 500, and 1,000 units for the core electric models, and on what Incoterms?
- What are sample cost and lead time, and mass-production lead times per container?
- Which products are made in-house versus outsourced, and what is the in-house capacity (stamping, die casting, powder coating)?

Questions to send to the supplier (continued)

- Can you share your latest SGS audit report (QIP-ASI2431369) or a fresh third-party audit with the address matching your registered site?
- Who exactly is the payment beneficiary on the invoice, and can you confirm it matches your legal entity exactly - no third-party accounts?
- Do you support U.S.-market voltage (110-120V), plug types, packaging, labeling, and carton marking?
- Can you provide test reports for electrical safety, EMC, and formaldehyde/CARB compliance for wood panels, and state which are held versus obtainable?
- Can you share recent export bills of lading and U.S. or North American customer references, including any Amazon sellers or distributors you supply?

THE EVIDENCE

05 Risks before payment

READ. QUESTION.
VERIFY. DECIDE.

05 / Risks to resolve before you pay

Questions to send to the supplier (continued)

- What warranty terms, spare-parts supply, and after-sales support do you offer for U.S. buyers and their end customers?
- What are the noise, duty-cycle, and cycle-life specs on the motors, and what is the motor/control-box brand and warranty?
- How do you handle defect rates, replacement parts in transit, and claims on FOB shipments?
- Are you open to OEM/ODM private-label programs, and what are typical tooling and customization costs?
- Do you accept trial orders or mixed-SKU containers below standard MOQ for a first U.S. order?

Legal-entity and contact conflicts

Candidate: Melissa, Business Manager (business card, sales02@prorials.com, +86-172 8038 3363)

Reason excluded: Not independently verified as a current employee or authorized contact anywhere in public evidence; the email domain matches the company but employment and authority remain unconfirmed. Treat as an unverified sales lead, not a contracting contact.

Legal-entity and contact conflicts

Candidate: Address No. 299, Zhenlongpi Road, Cixi Binhai Economic Development Zone, Ningbo (business card)

Reason excluded: Conflicts with the address repeatedly shown on the official site and Made-in-China profiles (No. 399 Longliu Road, same development zone). Card address is treated as unverified and possibly outdated or wrong until confirmed.

What this report cannot confirm

- Amazon, Walmart, Shopify, shopping, trends, news, images, maps, general web search, and direct website fetch research sources were unavailable and returned no usable results - no U.S. marketplace presence, pricing, ratings, or demand trends could be captured, and no findings should be inferred from them
- Reputation scan returned 'unknown' for all three contact indicators - this is an absence of data, not a safety clearance
- WHOIS domain age is young (May 2024) relative to the claimed manufacturing history; this is a risk flag, not proof of any wrongdoing
- Public evidence is overwhelmingly self-published (official site) or marketplace-sourced (Made-in-China/Alibaba); no independent registry, audit, or customer verification was obtained
- The official about-us page returned 404 during research, limiting direct company-background verification

What this report cannot confirm (continued)

- Factory/employee figures vary across sources, indicating possible profile inflation or stale marketplace data
- No bank beneficiary or payment account evidence exists; marketplace result counts, prices, ratings and trends generally would be directional snapshots only and none are available here
- No claim of legal or regulatory approval is made or should be inferred from any certification reference in this report

Checks before you pay

- Confirm beneficiary name matches the legal entity exactly before any advance payment.
- Require bank account in the company’ s registered name, not a third party.
- Verify that any proforma invoice comes from the same domain/contact route as the website.
- Do not rely on the business-card email alone as proof of payment authority.

Information the research could not establish

- Independent Chinese business registry record
- Verified legal representative or signing authority
- Payment beneficiary / bank account relationship
- Independent customer references in the U.S.
- Verified current employee profile for Melissa or Steven Sun

Information the research could not establish (continued)

- Clear downloadable PDF URLs from the site crawl
- Independent factory audit beyond marketplace claims

Deal cost status
Unavailable

Import documents summary
For the selected destination market: United States. No specific document evidence was returned by the live searches. Request the supplier's model-specific certificates, commercial invoice, packing list, certificate of origin, product labels and any customs or tax documents required for this market before quoting a landed cost.

Landed cost guidance
For United States, calculate landed cost as supplier unit price + packaging/tooling + China-side handling + freight/insurance + applicable customs duty + destination VAT/GST/taxes + inspection/warehouse/last-mile charges. The buyer's selected market is already applied; only the supplier and qualified logistics/customs provider can confirm the final rate.

Remote supplier verification

Status: Recommended

Reason: The reports support a plausible supplier, but identity, contact authority or payment readiness is not fully established.

What you can do yourself: Contact the supplier through the official channel and request legal, authority and payment documents.

How ChinaConnect247 can help: Structured identity, contact, exporter and payment-path verification with an evidence trail.

Indicative minimum fee (USD): 95

Indicative maximum fee (USD): 119

Quotation status: Draft

Risk and compliance support

Status: Recommended

Reason: Model-specific or destination-market documents remain required before relying on the supplier's claims.

What you can do yourself: Ask the supplier for model-specific certificates and confirm which documents apply in the destination market.

How ChinaConnect247 can help: Organized document requests and review of unresolved identity, product and destination-market gaps.

Indicative minimum fee (USD): 75

Indicative maximum fee (USD): 250

Quotation status: Quote Required

From an interesting supplier to a well-prepared next step.

Choose the support you need: supplier checks, product and quotation comparison, sample coordination, document follow-up, factory visits or inspection coordination. We confirm scope, timing and fees with you before work starts.
